

# Track Kerbs System

With Team Tetsujin's Track Kerbs System, you can make any course layout for any purpose. Have the freedom to design a realistic practice course. Combinations are endless!

Our Track Kerbs Systems are used at many circuits in Japan.

A 0.2mm line is carved on the surface of the kerbs system to allow wheels to slide off easily. When the wheels run on the line, they will also make particular sounds, allowing you to mark yours or other people's performance precisely.
